SUBJECT: SEAOR 135 FY 68 CLASS V MODIFICATION, TWO CHANNEL CAPABILITY FOR RT-10 SURVIVAL RADIO (U).

THIS PROPOSAL IS SUBMITTED IAW 7AFR 57-1, AFR 57-1 ATCH 1, AND CSAF(C) AFSMDA/AFRDQ-P91513, 14 DEC 66.

I. (C) DEFICIENCIES: THE RT-10 SURVIVAL RADIO CARRIED BY AIRCREWS IN SEA HAS A SINGLE CHANNEL RECEIVE-TRANSMIT-BEEPER CAPABILITY TUNED TO THE UHF EMERGENCY FREQUENCY. THIS SINGLE FREQUENCY LIMITATION PLACES VIRTUALLY ALL RESCUE COMMUNICATIONS ON ONE FREQUENCY CAUSING CONFUSION AND INTERFERENCE WITH OTHER EMERGENCY COMMUNICATIONS. A BEEPER OPERATING ON THIS FREQUENCY CAN EFFECTIVELY BLOCK ALL VOICE COMMUNICATIONS.

II. (C) REQUIRED OPERATIONAL CAPABILITY: THE CAPABILITY TO ESTABLISH VOICE COMMUNICATION BETWEEN DOWNED AIRCREWS AND SAR AIRCRAFT ON SECOND UHF FREQUENCY IS URGENTLY REQUIRED.

IV. (C) PROPOSED SOLUTION: PROVIDE THE RT-10 SURVIVAL RADIO WITH A TWO-CHANNEL CAPABILITY. RECOMMEND THAT THE RT-10 BE MODIFIED TO PROVIDE TRANSMIT-RECEIVE (NO BEEPER) ON 282.5 MHZ IN ADDITION TO PRESENT TRANSMIT-RECEIVE-BEEPER ON 243.0 MHZ.
