

30 July 67

ALL BATTALION ASSUMED
Alert 0700. Had one medi-
vac 2000 to 95th 173rd Airborne
troop had a laceration on
his throat. He lost a lot of
blood but no arterial or venous
involvement. Dispensary per-
sonal stopped bleeding. Put
fluff dressing on laceration
and started two IV injections.
Nothing could be done on my
part except raise patient's head
to slow down flow of blood and
keep IV's going. ACR's-1 (MED EVAC)
LCR's-1
