

Super Jolly rescues Navy pilot from br

DA NANG AFLD — A U.S. Navy pilot was rescued 16 miles northeast of Hue recently after mechanical problems forced him to eject from his aircraft.

Cmdr. Paul F. McCarthy was picked up by a U.S. Air Force HH-53 Super Jolly Green Giant from the 37th Aerospace Rescue and Recovery Squadron after floating in the South China Sea for half an hour.

"We were flying an air mission over Laos when the aircraft suddenly began to lose fuel," related Commander McCarthy. "I turned around and headed for water as fast as I could with my wing man tagging along to keep me in sight. Once I was in the water I didn't have long to wait. In no time at all I was aboard the chopper and heading into Da Nang."

Air Force Capt. David H. Wammer, commander of the helicopter that plucked Commander McCarthy out of the water, termed the rescue as "difficult" because of weather conditions. "It was strictly instrument weather all the way out," he said. "There was thick fog all the way down to the deck and no way to see the water unless we dropped below a hundred feet.

"Once we located the area it was no trouble to find the downed pilot. He was really prepared and gave us a big orange smoke flare as soon as we were close.

"Most of the trouble came when I tried to hover over the raft. We put smokes out to establish a reference point for maintaining a steady hover, but had to drop lower than normal in order to keep him in sight. It took four tries to finally establish a hover over

the survivor. From then on it was a matter of time."

Upon landing at Da Nang, McCarthy received the traditional 19-gun salute signifying a successful rescue.

HQ 7AF — The physical effects of heroin were explained by Dr. (Col) John N. Dunn, chief of professional services in the Air Force Surgeon's office.

Commenting on the effects of the drug, Dr. Dunn stated "one 'great high' with heroin is usually the first time it

Navy Pilot Gets Quick Rescue

A U.S. Navy A-7 pilot was rescued 16 miles northeast of Hue early last Saturday morning after mechanical problems forced him to eject from his aircraft.

Cmdr. Paul F. McCarthy was picked up by an HH-53 BUFF from the 37th Air Rescue and Recovery Squadron at 7:45 a.m. after floating in the South China Sea for half an hour.

"We were flying a mission over Laos when the aircraft suddenly began to lose fuel," related Commander McCarthy. "I turned around and headed for water as fast as I could with my wingman tagging along to keep me in sight."

"Once I was in the water I didn't have long to wait, in no time at all I was aboard the chopper and heading into Da Nang."

Capt. David H. Wammer, commander of the helicopter that plucked McCarthy out of the water, termed the rescue difficult because of the weather conditions.

"It was strictly instrument weather all the way out," he commented. "There was thick fog all the way down to the deck and no way to see the water unless we dropped below 100 feet."

"Once we located the area it was no trouble to find the downed pilot. He was really prepared and gave us a big orange smoke flare as soon as we were close."

"Most of the trouble came when I tried to hover over the raft. We put smokes out to establish a reference point for maintaining a steady hover, but had to drop a lot lower than normal in order to keep them in sight. It took four tries to finally establish a hover over the survivor. From then on it was routine."

Upon landing at Da Nang, the already-drenched Commander McCarthy received the traditional hosing down, signifying a successful rescue.

MONTHLY TOTAL 9

The aircraft commander of Jolly Green 72 who made the pick-up was Captain David H. Wanner.

The month of March started off with a Medevac from Con Son island to Long Binh hospital. On 2 March 71 the Jollys at our FOL were notified that a Vietnamese Seaman was very ill at Con Son. Jolly Greens 73 and 66 were dispatched to the island for the evacuation. The mission was completed without incident. The aircraft commander of the Jolly Green making the evacuation was Captain Karlton I. Bakke.

On 6 March 71 Jolly Greens 71 and 64 were holding west of Channel 103 in preparation for an attempted pickup of seven survivors of an Army helicopter which was shot down. One of the Sandy aircraft preparing the area was hit by ground fire and the pilot was forced to bail out. Jolly Green 71, flown by Major Mudd, observed the bailout and immediately recovered the pilot. Other Jolly Greens from the 37 ARRS took over the Witchdoctor mission but all attempts to rescue the seven survivors by helicopter were unsuccessful due to hostile fire. A ground team did recover the seven men the next day.

On 13 March 71 the 37 ARRS had a most eventful but unsuccessful day. A Navy A-7, call sign Battle Cry 315, was shot down at a position 225 degrees for 50 miles from Channel 103. The pilot of the A-7 had ejected and was injured. Voice contact was established with the survivor and the SAR was initiated. Jolly Greens 64 and 73 departed Channel 77 for the area. Sandy aircraft began working the area and small arms fire was observed.

Jolly Greens 64 and 73 were alerted on 19 February that Covey 275 had crashed west of Channel 77. Both helicopters proceeded to the scene where they were joined by the SAR force. No chutes were observed and no beeper could be heard. The cockpit seemed to be intact so it was decided that a pararescueman should be lowered to determine if there were survivors. This was accomplished and both Jolly Greens returned to Da Nang Afd, RVN.

On 25 February 71, Cobra 23 was shot down at 263 degrees for 43 miles off Channel 103. Jolly Greens 66 and 72 were scrambled from Da Nang and were placed in a holding point west of Channel 103. Jolly Greens 65 and 71 were later scrambled to the area. Weather and night fall prevented a pickup attempt so all SAR forces were returned to base. A first light effort was planned for the next morning. All SAR forces were reassembled in the area the next morning but the rescue was delayed until hostile forces could be eliminated. At 1230 Local the area was ready and the pickup of both crewmembers was successful. The low bird, Jolly Green 65 flown by Captain Bakke did take several hits from small arms fire during the rescue.

The last mission for February occurred on the 27th. The pilot of a Navy aircraft, call sign Chippie 414, bailed out feet wet off of Channel 69. Jolly Greens 72 and 71 scrambled to the scene and a successful water pickup was accomplished. Heavy fog in the area made this recovery very difficult.
